IP Address acquired via DHCP Load Admin Username root Password soho SSID Username Password root soho via DHCP Enter the IP acquired via DHCP into your browser and pressing enter. root soho Enter your router username. Enter your router password. This could be root, or one of these Press Enter, or click the login button. Portions © Wikidevi under CC BY-SA 3.0. To access your Iomega StorCenter IX2-200 (also known as Iomega Iomega StorCenter ix2-200, Cloud Edition Network Storage.) you will need the IP address and the login data (username and password). Important: This is not the login data for your Internet service provider. You can find this information in the Manual of your Iomega StorCenter IX2-200 (also known as Iomega Iomega StorCenter ix2-200, Cloud Edition Network Storage.) router. If you don't have the manual at hand or don't want to search the complete manual for the login credentials, you can use the Quick install guide which you can find below. To access the router login page it is important that you are connected to the router. Tip: If you have Wi-Fi problems and it is not possible to connect to the router, you can connect your computer and the router with a LAN cable. Login Guide for Iomega StorCenter IX2-200 Open your preferred browser and enter acquired via DHCP in the address bar to access admin panel of your router. Then you will see 2 fields where you can enter the router username and password. According to our database the default username of your Iomega StorCenter IX2-200 router is root and the corresponding password is soho. Enter the username and password, click on the login button and now you should have access to the user interface of the router. If the credentials do not work, try the following method In the list below you can find some of the most commonly used username/password combinations of Iomega routers. Try the following combinations. If you have problems logging in to the router or you have forgotten your password. Username Password rootsoho The most common IPs used by Iomega routers You have tried several different IP addresses and still none of them work? Then you should try the IP addresses from the following list. Default Router IP acquired via DHCP Nothing of the methods worked for me and I still not get access to my Iomega StorCenter IX2-200! If nothing helped and you really need access to your StorCenter IX2-200 router, there is also the possibility of a factory reset. In most cases you can perform a factory reset by pressing a small button on the back of the router for 10-20 seconds. After that the router lights up and needs some minutes to reset all settings. After a factory reset the router loses the connection to all other connected devices and some devices have to be reconnected to the router after such a reset. If you are unsure, you should consult an expert to help you set up the router again. More Iomega routers To access your Iomega StorCenter ix2-dl (also known as Iomega Iomega StorCenter ix2-dl.) you will need the IP address and the login data (username and password). Important: This is not the login data for your Internet service provider. You can find this information in the Manual of your Iomega StorCenter ix2-dl (also known as Iomega Iomega StorCenter ix2-dl.) router. If you don't have the manual at hand or don't want to search the complete manual for the login credentials, you can use the Quick install guide which you can find below. To access the router login page it is important that you are connected to the router. Tip: If you have Wi-Fi problems and it is not possible to connect to the router, you can connect your computer and the router with a LAN cable. Login Guide for Iomega StorCenter ix2-dl Open your preferred browser and enter acquired via DHCP in the address bar to access admin panel of your router. Then you will see 2 fields where you can enter the router username and password. Sometimes you can find the router login data on the back of the router. Alternatively look into the manual that can be found here: Manual of your router. Enter the username and password, click on the login button and now you should have access to the user interface of the router. If the credentials do not work, try the following method In the list below you can find some of the most commonly used username/password combinations of Iomega routers. Try the following combinations. If you have problems logging in to the router or you have forgotten your password. Username Password rootsoho The most common IPs used by Iomega routers You have tried several different IP addresses and still none of them work? Then you should try the IP addresses from the following list. Default Router IP acquired via DHCP Nothing of the methods worked for me and I still not get access to my Iomega StorCenter ix2-dl! If nothing helped and you really need access to your StorCenter ix2-dl router, there is also the possibility of a factory reset. In most cases you can perform a factory reset by pressing a small button on the back of the router for 10-20 seconds. After that the router lights up and needs some minutes to reset all settings. After a factory reset the router loses the connection to all other connected devices and some devices have to be reconnected to the router after such a reset. If you are unsure, you should consult an expert to help you set up the router again. More Iomega routers To get access to your Iomega StorCenter IX2-200 (also known as StorCenter), you need the IP of your device, the username and password. You'll find such information in the Manual of your Iomega StorCenter IX2-200 router. But if you do not have the manual for your router or you do not want to read the whole manual to find the default login information then you can use the quick guide below. To get to the router login page it's necessary that you are connected to the router. Iomega StorCenter IX2-200 Login Guide Open your web browser (e.g. Chrome, Firefox, Opera or any other browser) Type acquired via DHCP (the default IP to access the admin interface) in the address bar of your internet browser to access the router's web-based user interface. You should see 2 text fields where you can enter a username and a password. The default username for your Iomega StorCenter IX2-200 is root.The default password is soho. Enter the username & password, hit "Enter" and now you should see the control panel of your router. If above login credentials doesn't work with your Iomega StorCenter IX2-200 router then try this method Try different ID/password combinations that are widely used by Iomega that you'll find below. In this list are the most popular default username and password combinations used by Iomega. Sometimes the username and password doesn't work that we mentioned in the top of this guide. Then you can try these username/password combinations below to get access to your Iomega StorCenter IX2-200 wireless router. # Username Password 1rootsoho Default login IPs for my Iomega router You tried different router IPs but nothing worked? Did you try the following IPs? In the list below we listed all known router IPs for the manufacturer Iomega. Maybe this will work for you. # Default Router IP Iacquired via DHCP Nothing of the methods worked for me and I still not get access to my Iomega StorCenter IX2-200! All you need to do is to reset your StorCenter IX2-200 modem. This can be done easily by clicking on the reset button at the back or at the bottom of your router. If you hold down this small button for approximately 20 seconds, (you may have to use a toothpick), then your modem will get restored to the factory settings. What you need to keep in mind is that when you reset your modem, you will lose your connection online. It is therefore better to take an expert's assistance in this regard. Note: If you have not enough information, it is obviously recommended that you should get help from a person who has all the knowledge about this topic. Complete Iomega customer service contact information including steps to reach representatives, hours of operation, customer support links and more from ContactHelp.com. If your StorCenter IX2-200 router is not working as it should, dropping connections or not being responsive, you should first do a reset of the router to see if the problems persist. Other scenarios where you might want to reset your router is if you've forgotten the password or misconfigured it and can't get access anymore. Your can reset your Iomega StorCenter IX2-200 in the following way(s): The 30-30-30 reset There are no specific instructions for this model yet, but you can always do the 30-30-30 reset as follows: When router is powered on, press the reset button and hold for 30 seconds. (Use a paper clip or something sharp) While holding the reset button pressed, unplug the power of the router and hold the reset button for 30 seconds While still holding the reset button down, turn on the power to the unit again and hold for another 30 seconds. This process usually works for resetting any router to it's factory setting. Note: It is worth reading more about how to reset routers with the 30 30 30 reset and what the risks and considerations are when resetting your router this way, instead of just rebooting it.
